# Sales Analysis (Excel)

## Overview:

This project focuses on analyzing sales representatives' performance to evaluate productivity, identify top performers, and detect gaps in sales activities. The analysis helps improve decision-making related to team performance and sales strategy.

---

### ◇ Data Preparation & Cleaning

- Reviewed raw sales representatives dataset
- Cleaned inconsistent and missing data entries
- Standardized formats for names, dates, and sales values
- Removed duplicates and ensured data accuracy
- Structured data for analysis readiness

---

### ◇ Data Transformation

- Created calculated fields to evaluate performance metrics
- Used Excel functions (IF, SUMIFS, COUNTIFS, INDEX/MATCH)
- Aggregated data per sales representative
- Built helper columns for advanced analysis
- Organized data into structured tables

---

### ◇ Performance Analysis

- Analyzed total sales per representative
- Measured individual contribution to total revenue
- Compared performance across different reps
- Identified top-performing and low-performing sales reps
- Evaluated consistency of performance over time

---

### ◇ KPIs & Metrics

- Total Sales per Representative
- Contribution % لكل Rep
- Number of Transactions / Deals
- Average Sales per Rep

- Performance vs Target (لو موجود)
- Ranking of Sales Representatives

---

## ◇ Reporting & Visualization

- Created summary tables for performance comparison
- Built reports highlighting key insights
- Ranked sales reps based on performance
- Highlighted gaps and improvement areas
- Presented results in a clear and simple format

---

## ◇ Insights & Findings

- Identified high-performing sales reps driving most revenue
- Detected underperforming reps needing improvement
- Found variations in performance consistency
- Highlighted opportunities to optimize team performance

---

## ◇ Outcome

The analysis provided clear visibility into sales team performance, helping in identifying strengths, weaknesses, and opportunities for improvement, which supports better sales management decisions.
